

SUMMARY

Software Engineering Graduate and Full-Stack Software Developer with experience in leading development teams, delivering front-end features, and collaborating with sponsors on production-ready software. Passionate about accessible and intuitive front-end development.

EDUCATION

Michigan Technological University | Houghton, MI

May 2026

BS Software Engineering Major | High Honors | 3.90 Departmental GPA | 3.75 Overall GPA

PROFESSIONAL EXPERIENCE

Software Development Intern – Fair Medical Hire, Creative Mines Software

February 2026 - April 2026

August 2025 - January 2026

- Designed and built a React-based web application for hiring medical professionals in an 8-week time frame.
- Built customizable marketing pages using Payload CMS.

Software Development Intern – Solar Comply, Creative Mines Software

August 2025 - January 2026

- Worked with RaptorMaps to create a viable MVP managing access and policies of solar assets within a 3 month time-frame.
- Built 3 interconnected apps using PayloadCMS, React, RadixUI, pgAdmin, and drizzle.
- Developed form builders and highly customizable table components that manage access requests to solar assets.

Software Development Intern – Project ARCH, Creative Mines Software

October 2024 - August 2025

- Developed a React-based collaboration hub designed for researchers and virtual conferences, hosting events for many universities and research institutes like Google DeepMind.
- Built and enhanced features in real time based on research metrics collected by the Santa Fe Institute to improve user experience.
- Developed advanced PDF viewing and annotation features, including text highlighting, commenting, and drag and drop uploads.

Project Manager – HIDE Enterprise - HERP Atlas

August 2024 - Current

- Initiated development of an iOS application using .NET and C# to track field notes for Michigan HERP Atlas Society, while focusing on meeting scientist needs and manipulating a backend hosted on AWS.
- Led a team of 3 developers to meet deadlines and sponsor requirements.
- Designed and implemented a custom API using PHP to connect the Wordpress backend with the mobile application.
- Drove the project through to completion, including preparation for App Store deployment.

Undergraduate Research – Security and Privacy Lab at Michigan Tech

April 2023 - December 2023

LEADERSHIP AND INVOLVEMENT

Serve the King Christian Fellowship - Leadership Team 2024 - Public Relations & Worship - Maintains social media platforms and weekly announcements as well as organizes and runs music practices for worship.

TECHNICAL SKILLS
